TÄNÄÄN (TODAY)

Tänään-page offers varied content suggestions for versatile daily use. The content can be played either in small bits or in one go. Play an individual program by clicking it. Play multiple individual programs by tagging wished programs with the square on the left and click the "Soita valitut" -button. Play an entire section by clicking the section title. Playing stops after the last program in the section. Pictures and instructions don't interrupt continuous playing. Listeners can be given the chance to decide which content is streamed, thus making their opinions heard.

TEEMAT (THEMES)

In **Teemat**, content is categorized by themes, like love or specific people. Choose a theme by clicking its name and start programs from program buttons. Explore themes with the search function. Simple Finnish words/parts of words work the best. The newest themes can be viewed by ticking the "Näytä uusimmat ensin" -box.

SUOSIKIT (FAVORITES)

Suosikit -page has all programs that have been tagged as favorites with the -icon. Play content by clicking the name of the program. When a theme is chosen from the Teemat -section, the chosen theme opens in the Teemat -page (see above). Continuous playing of the favorites list starts when the title "Musiikki ja ääniohjelmat" is pressed. Content can be unfavorited by relicking the heart icon. Explore more programs with the "Hae ja lisää sisältöä" -function at the end of the page.

MUSIIKKI (MUSIC)

Choose wished music categories by clicking category names. Music starts when the length of the playlist (1/2 h, 1 h, 2 h) is determined. Note that if the screen of the used device shuts down, music may stop playing (screen display settings can be adjusted from the device settings). Reset the page by clicking **Musiikki** from the main navigation. The selection of categories can be changed during playing but new selections activate only after the length of the playlist is chosen. The contents of each music category can be viewed from the Haku -page (see below).

PELIT (GAMES)

Pelit -page has different kinds of games for solo playing or playing together. Some games require printing materials. A link for printing with a computer is provided.

HAKU (SEARCH)

Explore the contents of Sävelsirkku with the **Haku** -function. Search can be filtered to include only programs, themes or music. Simple Finnish words/parts of words give the best search results. Use "%" to substitute for a part of a word or a punctuation mark. Reset the page by clicking Haku from the main navigation.
